Project: New Haven Urgent Care   **Team#**

Test Date: 12/5/2020

Test Case ID#: 16   **Name(s) of Tester(s):**
John Hendrickson

Test Description (What are you testing? – you must be specific):

Can an initial assessment be complete by only one nurse?

NOTE: The following information must be provided to be given credit for any test.

Test Data (Provide the file name of the script used to insert data, provide a screen capture to reflect data, or provide script here):

No data script was needed for this test case.
SQL Query(s) used for testing:
```
CREATE TABLE IF NOT EXISTS INITIAL_ASSESSMENT(
    -- 8 bit uuid
    Aid CHAR(8) PRIMARY KEY,
    -- height unit: cm
    Height FLOAT(8, 2),
    -- weight unit: kg
    Weight FLOAT(8, 2),
    -- blood pressure unit: mm Hg
    Blood_pressure INT,
    -- Temperature unit: Celsius
    Temperature FLOAT(8, 1),
    -- palse unit: beats per minute
    Pulse INT,
    Nid NOT NULL FOREIGN KEY REFERENCES NURSE(Nid)
);
```

Nid (Nurse id) is a foreign key attribute of INITIAL_ASSESSMENT and therefore only one Nid can exist for each assessment.
